

Pass1 Production at ilx

J.L. Klay, LLNL

Run list taken from Run Database browser

Production runs with > 10k Events, up to 15-Jun-2005

217 runs, 4.26 Million Events

Bismuth: 633k

Beryllium: 232k

Empty: 155k

Carbon: 738k

(Carbon 2%: 528k)

Aluminum: 35k

empty Cryo-Target: 468k

LH2: 1.91M

none: 37k

LLNL Output

- Processing odd-numbered and $(\text{run} \% 10 == 0)$ runs --> 133 runs
- Out of 133,
 - 10 jobs failed due to missing raw files (transfer of these files is happening now...)
 - 117 failed when trying to write TOFCalib constants to the db (not a connection problem but buggy software...)
 - 6 jobs successfully completed (no idea why these worked and the others didn't; we're looking into it)

Job chronology

Run #	Target	# events	Raw2root (min)	Pass1 (min)
11609	Empty	11,384	41 (278/min)	28
12859	LH2	16,666	39 (427/min)	60
13000	LH2	15,434	32 (482/min)	51
13013	LH2	34,714	66 (526/min)	108
13019	LH2	23,195	50 (464/min)	79
13020	LH2	21,043	41 (513/min)	64
